BLASTSAFE™
ORIGIN HELMET FOR ABRASIVE BLASTING

MADE FOR BLASTHEROES

The ultimate personal protection for abrasive blasting

The Blastsafe ORIGIN is a long aproved protection system for abrasive blasting.

The integrated ear muffs gives the operator a uniqe sound protection. The helmet protects the user agains injuries, and also have a layer of recoil damping material. We have also upgraded the helmet with a new ergonomic inlays and a new improved detachable protection hood/cape.

- **CE approved EN 14594 Class 4**
- **Noise reduction of 41 dBA**
- **Integrated hearing protectors**
- **Integrated hard hat**
- **Airflow safety indicator**
- **High user comfort with detachable softpad**
- **Low weight**
- **Rubber coated** (recoil and sound damping)
- **Adjustable head band**
- **Sound trap construction**

Ideally to be used together with
Blastsafe SOURCE or ULTRA - suits for abrasive blasting
Blastsafe SKYWALKER - boots for abrasive blasting
Blastsafe IRONGRIP - gloves for abrasive blasting

This gives you a complete **SYSTEM** for the harsh abrasive blasting environment.

"With double hearing protection (earplugs and hearing protectors) -one will be protected against harmful noise levels in most situations."
Sinus AS

«WE TAKE IT PERSONAL»
Shotblasting is a heavy, extremely noisy job. Most shotblasters have to quit work early in their life and some suffer from bad hearing damage at later age.

The better the worker is protected, the more comfortably he feels, the more productivity is to be expected. Increased comfort and noise reduction equals higher productivity!
